### ***Soft Soothing Sounds* Announces a New Album *Float* by Craig Colley**

Laguna Niguel, CA - *Soft Soothing Sounds* is proud to announce the latest album release from Craig Colley. *Float* is now available on YouTube, Spotify, Apple Music, Amazon, iHeart, Pandora, Deezer and wherever you listen to music.

*Float*, an original piano and floating time-lapsed cloud themed music video is tenderhearted and compassionate music inspired by beautiful cloud formations floating by in Southern California.

The album consists of 11 new original instrumental piano pieces. Some of the favorites are Ascend, Float, Rise and Roam. The album is 44 minutes of beautiful, passionate calm, pensive and contemplative cinematic melodies, and lush chord progressions.

It is simply magical how Colley creates his music 'live' with breathtaking artistry. The entire recording is 100% improv and written as it happened.

Listeners of *Float* report that it is possible to have consistently productive, upbeat, and grounded days with less stress, anxiety and pain while viewing and listening to the dynamic and beautiful intonations.

*"Simply incredible and inspiring music and video".*  
Greg C.

Colley, a classically trained composer, musician, and videographer created *Float* for anyone wishing to witness slow moving clouds against a deep blue sky to escape the stress of daily life. (*Watch closely for soaring birds in the video*).

*Float* has already garnered thousands of views on YouTube and can also be viewed on Facebook, Instagram, TikTok and LinkedIn. (*YouTube – Complete album and music video* - <https://youtu.be/n8cp4IRU9el>)
