***Soft Soothing Sounds* Announces a New Album *Drops* by Craig Colley**

Laguna Niguel, CA - *Soft Soothing Sounds* is proud to announce the latest album release from Craig Colley. *Drops* is now available on YouTube, Spotify, Apple Music, Amazon, iHeart, Pandora, Deezer and wherever you listen to music.

Drops, an original piano and mountain rainstorm themed music video was inspired by the 1000-year rainstorm in the Eastern Sierra Mountains of California. The notes drop like rain on this lighthearted and playful instrumental piano music album for peaceful relaxation, contemplation, calming and stress relief.

The album consists of 8 new original instrumental piano pieces. Some of the favorites are Sprinkles, Drops, Dew Drops and Drizzle. The album is 49 minutes of beautiful, passionate calm, pensive and contemplative cinematic melodies, and lush chord progressions.

It is simply magical how Colley creates his music 'live' with breathtaking artistry. The entire recording is 100% improv and written as it happened.

Listeners of *Drops* report that it is possible to have consistently productive, upbeat, and grounded days with less stress, anxiety and pain while viewing and listening to the dynamic and beautiful intonations.

"Your music is beautifully designed and expressed in a way that is captivating, within each note. With an open invitation for nature to join along".
Tammy F.

Colley, a classically trained composer, musician, and videographer created *Drops* for anyone wishing to witness a slow and steady mountain rain with music to match to escape the stress of daily life. (*Watch closely for ducks and birds in the video*).

Drops has already garnered over 5400 views on YouTube and can also be viewed on Facebook, Instagram, TikTok and LinkedIn. (*YouTube – Complete album and music video* - <https://youtu.be/MyQzNSCNQ8I?si=vVtA8JIRvPU97GmH>)
