Music + Nature SOUNDBOX AUDIO PLAYER

The Soft Soothing Sound Box has especially been appreciated by our special needs patients. The Soothing Sound Box has a calming effect on them and their anxiety levels have been noticeably less."

Sincerely, Dr. Ruth M. DACM, L.Ac

There is nothing worse than dead air at places that are unfamiliar, uncomfortable or stressful.

What others have said ...

"The music is beautifully designed and expressed in a way that is captivating, within each note. With an open invitation for nature to join along is a powerful force." Tammy. F.

"I love it and listen to it everyday! So simple to use. I turn it on and it plays all day without repeating. I can't believe how long I've lived without it!" Greg C.

"Finally a simple to use tech product that actually works without disruptions, ads, drop outs, loss of connectivity and the need for frequent updates. This ends all of that everyday frustration." Pam G.

The more at ease your child, students, their friends, family, teachers and staff, the better everyone functions as a whole.

soft soothing sounds SoundBox
